

OAK CHIPS INC

Declaration of Organic French and American Oak

There is no organic certification for French and American white oak used for winemaking. Because oak trees grow naturally and are not cultivated, they can be considered organically grown due to the absence of pesticides and fertilizer applications. When the logs are processed, no chemicals are added or used, and air drying occurs naturally in the mill's seasoning yards.

At Oak Chips, Inc. (OCI), all the oak we use comes from one supplier, so we can be sure of the quality and origin of our supplies.
